

SIGNODE SLB

Sealless Battery Powered Combination Tool

Easy to operate

The SLB Sealless applies a sealless joint and is perfect for mid-duty to heavy-duty strapping applications. Its battery component simplifies its operations, it allows you to move from a pneumatically powered tool to an easier to use battery tool without making any compromise on power or reliability.

Simple to maintain

All the SLB key parts can be easily accessed and serviced when required. Your tool can be repaired and returned within minutes.

Versatile

You can use it with a single hand without hand fatigue.

Durable

You can rely on SLB compared to air power without losing tensioning power.
